

Pitivi 1.0: We are getting there!

Thibault Saunier

# Pitivi

- ▶ Video Editing Software based on GStreamer
- ▶ Started in 2004. . . .
- ▶ Main user of the GStreamer Editing Services

## Generally useful now!

- ▶ People are editing complex projects with it
- ▶ Some companies start using it for their basic edit needs
- ▶ Many bugs and enhancements landed in GStreamer itself to support our use case

# What is next

- ▶ Finalize 1.0!
- ▶ Already branched 1.0
  - ▶ Master is going to be the next major version
- ▶ Better take advantage of the power of GStreamer
  - ▶ Nicely expose UIs for effects
  - ▶ Hardware acceleration (gl?)
- ▶ Master is already extensible through plugins

## Conclusion

```
flatpak install --user --from http://goo.gl/cEVZbt && \  
flatpak run org.pitivi.Pitivi
```
